

## Cellular Phone POS for Microsoft Dynamics-NAV

This solution is geared toward Cellular phone agents of large national brands such as T-Mobile and Verizon. Our solution integrates the entire business system from the point of sale interface through to back-office accounting. The solution collects appropriate data from the customer at the point of sale and uses the data to manage the back-end accounting and operational issues of a Cellular Phone Reseller.

Specific features include extensive commission reporting capabilities and extensive business rule development unique to this industry with these specialized functions:

- Carrier commission tracking,
- Automated commission matching,
- Variance reporting,
- Bundled handset pricing,
- hyperlinks to electronic activations,
- end of day reports.

This system is ideal for those companies that are either just starting out in the Cellular phone Reseller business or are upgrading because their existing system does not allow for an integrated approach to business management.
